

Horse 4MID[®] Kit (Ref. 4VDX-18K3) A Functional Assay of Sperm Quality and Male Fertility

Horse 4MID[®] Kit Main Advantages

- Based on a **functional sperm parameter** called proAKAP4
- Only a **few microliters required**
- Works with **fresh, chilled** or **frozen semen** in extenders
- **Easy to use**, robust and cost-saving testing kit

Horse 4MID[®] Kit Description

The **Horse 4MID[®] Kit (Ref. 4VDX-18K3)** is a robust ELISA kit that contains all reagents and buffers required for the quantification of proAKAP4 protein in all types of horse semen samples.

Product reference

4VDX-18K3

Specificity

Horse proAKAP4

Analytical range

0 - 150 ng

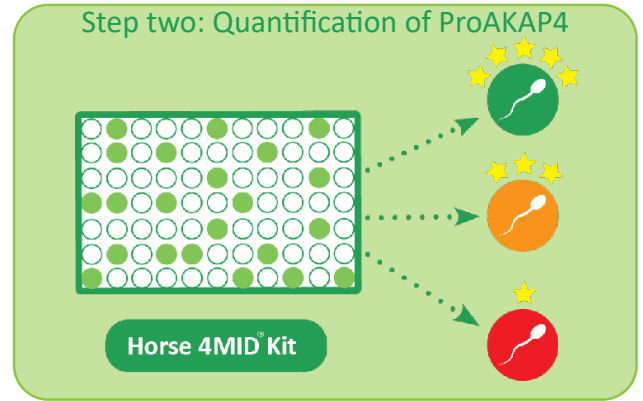

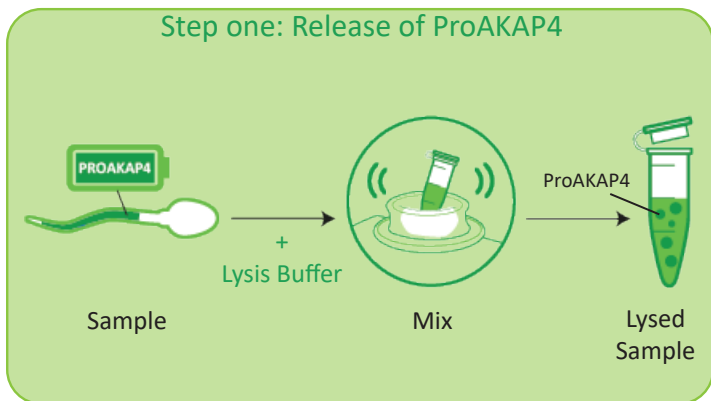

Number of analysis

1 to 88 samples

Horse 4MID[®] Kit (4VDX-18K3)

An Innovative Approach to Assess Sperm Quality

Applications of the Horse 4MID[®] Kit:

- Semen quality assessments
- Qualification of each ejaculate / each straw
- Functional indicator of male fertility
- Selection of sperm with long-lasting motility

Background: ProAKAP4 is a Functional Marker of Sperm Motility and Male Fertility

ProAKAP4 is the precursor of AKAP4 that is a structural protein playing a key role in sperm motility, capacitation and fertility. Spermatozoa without proAKAP4 are abnormal, immobile and infertile. The concentration of the proAKAP4 marker is a good indicator of sperm quality and fertility and of how the spermatozoa will stay motile and fertile over time.
